DYNAMIC REPORT GENERATOR

With Dynamic Report Generator (DRG), users can select any report template running in the Run Time and generate a new report on demand instantly. This module is available as a standard windows application (generate.exe), a Web application and as an Active X component (AXC_ODS_Generate) to be integrated into a SCADA application for example.

Dynamic Report Generator

DRG offers multiple options to generate reports "On Demand":

- It can generate reports with their original settings to get up-to-date values
- or modify the following settings options before execution.

CHANGE CPU CLOCK

To replay previous reports, without changing any object configuration

CHANGE TIME PERIOD

Means forcing each object defined with new time period settings.

ABSOLUTE/RELATIVE TIME (EX: FROM JAN 1, AT TODAY)

FIXED PERIOD (EX: LAST MONTH)

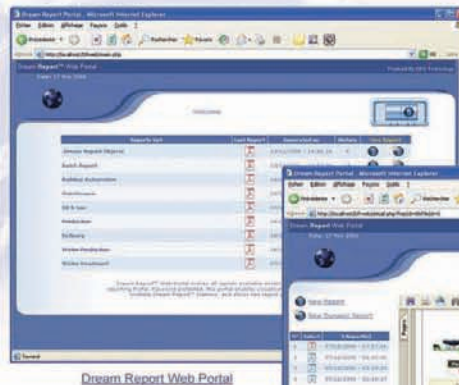

BATCH NAME (SELECT DIRECTLY THE BATCH ID)

DREAM REPORT WEB PORTAL

Dream Report Web Portal is ideal for distributing and sharing reports over the Internet/Intranet. Users can easily browse and display PDF reports from the current project running or generate new reports on Demand using Web DRG. It can be customized and integrated in other web portals.

DREAM REPORT WEB PORTAL BASE FUNCTIONALITIES

- Password protected
- Multiple concurrent users
- Multiple Dream Report Stations accessibility
- Manages access rights and display of authorized reports
- Enables access and visualization of any archived report
- Enables generation of new reports
- Multilingual

Dream Report Web Portal

DREAM REPORT WEB PORTAL KEY BENEFITS

Dream Report Web Portal is ideal for improving global asset management and facilitating business decision by providing proactive up-to-date reports.

It can be used by any operators, managers, executives and also by customers, organizations and suppliers that want to be permanently connected and interact with the field.

Dream Report turns data into valuable information, DR Web provided it to you anywhere.
